Full-Stack AI Engineer | Gen AI | MERN | Nest.js | .NET Core | Open
to Full-Time Roles
Ramnagar, Uttarakhand, India

Summary

Backend engineer with 2 internship experiences building and shipping production-grade systems. As an intern at Techwalaa, I worked on full-scale backend system from a Figma spec using NestJS, TypeScript, PostgreSQL, and Prisma, owning everything from schema design to business logic and debugging. As an intern at ASharp Info Tech, I worked across several client projects in .NET Core, C#, SQL Server, and MongoDB. Two of those projects went live. On the AI side, I build real applications powered by LLMs — RAG pipelines, AI agents, and LLM-integrated full-stack apps using LangChain.js, LangGraph.js, Gemini API, and Pinecone. Final-year B.Tech student in CS (AI/ML) from GBPIET, graduating June 2026. Available to join immediately. Tech: Node.js, NestJS, TypeScript, React, Next.js, PostgreSQL, MongoDB, .NET Core, C#, LangChain.js, Gemini SDK, Pinecone, MCP Servers Portfolio: <https://lalit-kumar.vercel.app/> GitHub: github.com/kumarlalit79 Email: kumar.lalit.tsx@gmail.com <https://thepromptacademy.com/lalit>

Experience

Techwalaa

Back End Developer

January 2026 - April 2026 (4 months)

Remote

Backend Intern

ASharp infotech

Software Engineer

August 2025 - August 2025 (1 month)

New Delhi

Role : Dot Net Developer

During my internship at ASharp Infotech, I worked on four real-world projects, including an e-commerce platform and a CRM dashboard. My responsibilities

involved developing features, fixing bugs, and improving UI/UX across .NET Core, MVC, Razor Pages, SQL Server, Web Forms, and Next.js applications.

This internship gave me hands-on exposure to real development cycles, problem-solving, and delivering production-level features.
